**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-14 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record, alone or in combination, fails to teach or fairly suggest an electromagnetic flowmeter comprising: a signal conversion section which separates a component of a first frequency from the electromotive force detected by an electrode to obtain an amplitude, separates one of components of sum and difference frequencies of a first and second frequency from the electromotive force to obtain an amplitude, and obtains a ratio of the amplitudes; and a flow rate output section which calculates a flow rate of the fluid on the basis of the amplitude ratio obtained by the signal conversion section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
